

Attention Earth & Life
Science Teachers!

ONONDAGA CREEK WATERSHED CURRICULUM

::: PROFESSIONAL DEVELOPMENT WORKSHOP :::

Please join us for a day of hands-on stream
science in the Onondaga Creek Watershed

Thursday, June 1, 2023
8:30 am - 3:00 pm

If you are looking to engage your students in place-based science that meets the Next Generation Science Standards, then this is the workshop for you! Led by a team of educators and scientists from Onondaga Environmental Institute, this workshop delves into a newly created stream ecology curriculum rooted in the Onondaga Lake and Onondaga Creek Watersheds. Teachers who attend will have access to the curriculum, curriculum kits containing everything needed to teach the lessons, and the confidence to do it!

To learn more about the event, email us at sjohnson@oei2.org

Support for this project is provided by OCM BOCES

Funding is provided by: CNY Community Foundation & John Ben Snow Foundation
